TRIVIM

Version: alpha

Installation manual

USER

❖ **Minimum System Requirement:**
  - Operating System: Windows XP/7 or higher version, 32/64-bit operating system.
  - RAM: 1GB
  - Free Memory Required: 1.5GB
  - Processor: Core 2 duo (2.23Ghz) or Higher

❖ **Running the Software**
  - Extract the given or downloaded ZIP file.
  - Double click on Trivim.exe to execute the Application.

  NOTE:
  - *Before running the application, confirm the proper functioning of Google Sketch UP software.*
  - *Double click on SketchUp.exe (inside resources\Google SketchUp 8).*
    - *If it runs fine, then start running the Trivim application.*
    - *If not, then download and install Google Sketch UP 8.*
      - *Copy the build.rb (inside resources\Google SketchUp 8\Plugins) to the Plugins folder of newly installed Google SketchUp 8 (inside default installation directory).*
      - *Replace the "Google SketchUp 8" (inside resources) folder with the newly installed Google SketchUp 8 (inside default installation directory) folder.*
